

Comprehend Clinical™ is a next-generation clinical data reporting and visualization tool for the pharmaceutical industry.

Comprehend Clinical™ enables decision-makers to efficiently analyze large clinical data sets across disparate clinical data platforms such as Phase Forward InForm™, Oracle Clinical™, ARISg™, Medidata Rave™, Phase Forward Clintrial™, Oracle LSH, Oracle CDC and even proprietary EDC or other in-house systems, without moving data.

Comprehend Clinical™ has an extremely intuitive user interface and offers flexible, customized configurations to suit individual organizational needs. By leveraging existing metadata and industry knowledge, Comprehend Clinical™ provides a powerful clinical review tool that gives CROs, EDCs, pharmaceuticals, medical device makers and biotechs a competitive advantage for today's market challenges.

Empower your customers and decision makers to make the most out of data with Comprehend Clinical™.

Key Features:

- Simultaneously report against multiple data sources, without moving data
- Reports, Charts, Crosstabs, Graphic Patient Profiles, and more
- Simple ad-hoc reporting and visualizations
- Works through any standard web browser, no plugins required
- Dashboard interface shows up-to-date reports upon logging in
- Dashboards can also be embedded on external websites or portals
- Interactive drill-down between all open reports and visualizations
- Flexible, pervasive subletting by patient, visit, geography, site, and more
- Ability to save reports and graphs for later or to share with others
- Advanced security settings, heavily customizable to protect every dimension of the data
- Additional data blinding features, on top of the data management system

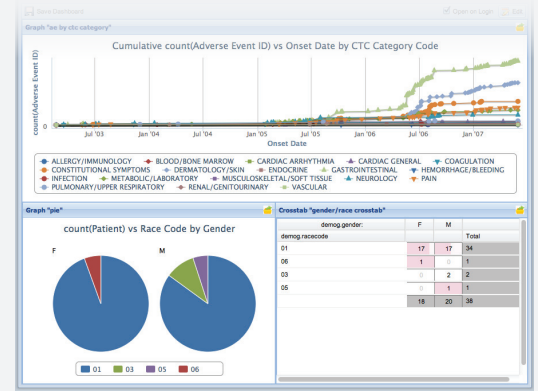

True Multi-Data Source Reporting

Comprehend Clinical was built from the ground up to facilitate reporting across multiple data sources, without moving the data

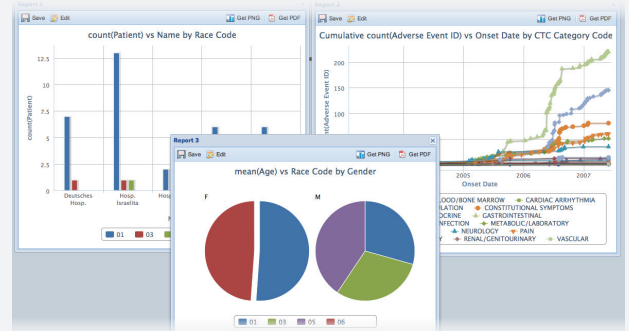

Interactive Dashboards provide high level overviews

Comprehend Clinical™'s interactive dashboards provide a high level overview of your company's most important metrics. They are accessible upon login, can be accessed from any web browser or mobile device, and can even be embedded in other websites or portals.

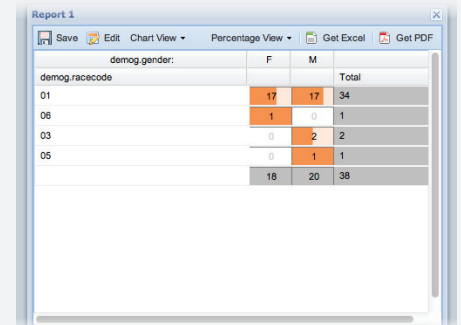

Intuitive, pixel perfect Graphs and Visualizations

Complex graphs and visualizations are made using our drag-and-drop UI. We support line, scatter, column, pie, pareto and many others.

Intelligent Highlights and Filters

Comprehend Clinical™'s highlights and filters provide additional insight into the underlying data. Compare specific patient sub-populations, or set highlights for anomalous outliers.

The report window displays the following cross-tab table:

demog.gender:		F	M	Total
demog.racecode				
01		17	17	34
06		1	0	1
03		0	2	2
05		0	1	1
		18	20	38
